### Clear Scanning Advantages

One of the clear advantages of the Epson STYLUS CX5700F multi-function printer is its sophisticated scanner operation featuring Auto Skew Correction and Colour Restoration. With the Colour Restoration feature, intelligent software automatically restores image colour that has been subjected to fading and other colour loss influences, such as light and airborne contaminants. Then, with the Auto Skew Correction feature, even images placed at an angle on the scanner bed are automatically adjusted to produce straight prints.

## DURABrite™ Ultra Ink

Prints that withstand the test of time! With advanced Epson DURABrite Ultra ink, the Epson STYLUS™ CX5700F generates prints that have a lightfastness rating of up to 120 years\* and have outstanding resistance against airborne contaminants, handling and even moisture. It's when it comes to print quality, though, that the Epson STYLUS CX5700F's DURABrite Ultra ink quite literally shines.

Water resistance

## Individual Intellidige™ Ink Cartridges

Featuring individual Epson Intellidige ink cartridges, the Epson STYLUS CX5700F maintains the Epson lead in multi-function printer ink management excellence. Each Intellidige ink cartridge is sophisticated circuitry that maintains an accurate record of how much ink has been used and the amount remaining. It's this Intellidige advantage that makes it the best system for using full cartridges for continuous large print jobs and partly used cartridges for smaller jobs - maximum ink usage, maximum benefits.

## Brilliant Epson Print Quality

Epson multi-function printers are world renowned for their industry leading print quality and the Epson STYLUS CX5700F is no exception. Utilising the Epson Variable Sized Droplet Technology, 5760 x 1440 Optimised dpi using Resolution Performance Management and advanced Micro Piezo print head, ink droplets down to a mere 3pl can be placed with incredible accuracy anywhere in the print area.

Data is calculated using accelerated simulation of fading under indoor preservation conditions including fluorescent light indoor display. Temperature, humidity and some atmospheric gases may also affect the rate of fading. The estimated lightfastness period does not indicate the colour changing or the durability of the paper itself.
